

STUDENT EXPENSE TRACKER

A student-focused expense tracking application, visualize income, expenses, and savings.

Problem:

-  Students often lose track of daily expenses.
-  No proper system to monitor spending.
-  Leads to poor financial discipline.

Why It Matters:

-  Unplanned spending reduces savings.
-  Lack of financial awareness affects future habits.
-  Students need simple money management tools.

Our Solution:

01

Web App Tracking.

A web app designed for the systematic tracking of monthly income and expenditure.

02

Category-wise Management.

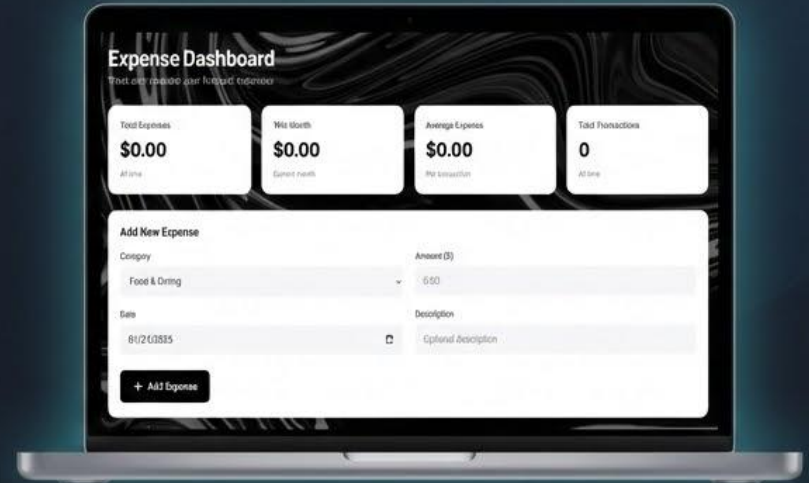

Category-wise expense management to enhance data condensation and organization.

03

Graphical Visualizations.

Advanced graphical visualizations to enhance data analysis and insights.

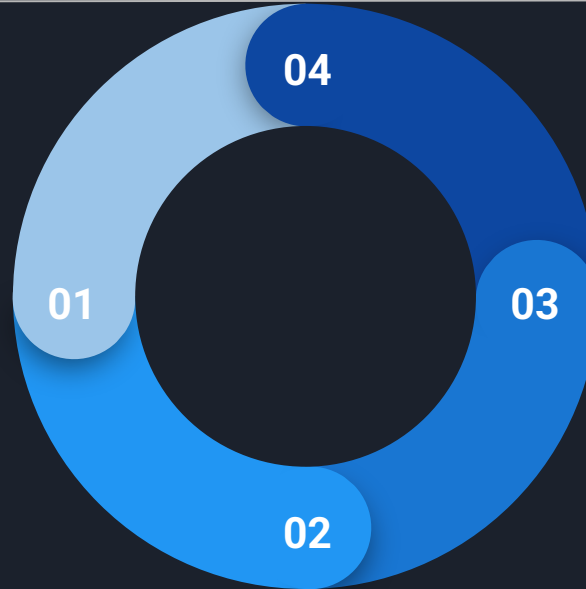

How It Works:

User enters daily expenses under categories.

App calculates total spending under each category.

All the entries made by user is stored in database for future access

App displays data using Pie and Bar graph.

IMPACT:

Improves financial
awareness

Encourages smart
spending and
saving habits

Simple, visual, and
student-friendly
